Business Central Connector for DocuWare - Add-On for the Microsoft Dynamics 365 Business Central ERP system

DOCUMENT MANAGEMENT WITH DOCUWARE SEAMLESS INTEGRATION WITH BUSINESS CENTRAL

In many companies, audit-proof document archiving involves a great deal of manual effort–regardless of whether documents are still stored in filing cabinets or already in digital archives. The large volume of incoming and outgoing documents in particular costs time and carries the potential for errors.

Since the majority of these documents are created directly in the ERP system, it makes sense to start the digitization process right here.

DocuWare as a DMS – perfectly integrated with the Dynamics 365 Business Central ERP system

The Business Central Connector for DocuWare seamlessly connects the DocuWare document management system with Microsoft Dynamics 365 Business Central. This merges ERP and DMS into a comprehensive solution for digital document management.

Automatic archiving and indexing. Assignment to relevant business transactions.

The connector automatically archives documents directly from Business Central, tags them with keywords, and assigns them to the correct business transactions–such as quotes for customers or invoices for suppliers.

Whether it's filing, indexing, or quickly retrieving documents, many time-consuming and error-prone steps run completely automatically in the background.

HOW YOU BENEFIT:

You save time and money by automating invoice imports and other daily processes.

You avoid errors by automating filing, archiving, and indexing.

You have legal certainty thanks to audit-proof and legally compliant archiving of your documents.

THE MOST IMPORTANT HIGHLIGHTS

> Documents are stored centrally in one location and all criteria for good archiving are met.

> Fully automated archiving of outgoing documents: invoices, delivery notes, order confirmations appear under the order/customer; product data sheets appear in the article master/order item.

> Fully integrated view directly in Business Central – for incoming and outgoing documents.

> The Dynamics 365 Connector for Business Central can be implemented quickly and easily on your own.

> You have legal certainty thanks to audit-proof and legally compliant archiving of your documents.

> You do not need a printer switch, third-party software, or interface software.

DMS AND ERP. PERFECTLY INTEGRATED.

"With the Business Central Connector for DocuWare, we automate document storage right where it originates: in the ERP system. Business Central and DocuWare integrate seamlessly–audit-proof, cloud-based, and without media discontinuity.

This allows companies to significantly reduce manual effort and create a reliable foundation for efficient processes."
