

## Business Central Connector for ELO - Add-On for the Microsoft Dynamics 365 Business Central ERP system

# DOCUMENT MANAGEMENT WITH ELO SEAMLESSLY INTEGRATED INTO BUSINESS CENTRAL

In many companies, audit-proof document archiving involves a great deal of manual effort. Even with digital archives, the challenge of efficiently managing the constant growth in incoming and outgoing documents remains. Many of these documents are created directly in the ERP system. This is exactly where the Business Central Connector for ELO comes in.

[ELO's audit-proof archiving as a DMS and Business Central as an ERP work together perfectly.](#)

The Business Central Connector for ELO seamlessly integrates the ELO document management system into Microsoft Dynamics 365 Business Central. Documents from the ERP system are automatically archived, indexed, and assigned to the correct business

transactions—both systems work together perfectly without any manual intermediate steps.

[Ready to go: Completely in line with Dynamics 365 Business Central](#)

The Business Central Connector for ELO is quick and easy to set up—with the right instructions, you can easily install it yourself. This allows you to link your ERP and DMS in just a few steps and effectively automate your document management.

This means that both products are fully in line with the philosophy of Business Central, which can also be lean at the start and, thanks to its wide range of functions, is a loyal companion for many years to come.

# HOW YOU BENEFIT:

You save time and money by automating invoice imports and other daily processes.

Can be implemented and set up quickly and easily—even on your own.

You can work anywhere: on the go or from home—thanks to a complete cloud solution.

## THE MOST IMPORTANT HIGHLIGHTS

- > You have legal certainty thanks to audit-proof and legally compliant archiving of your documents.
- > You don't need a printer switch, third-party software, or interface software.
- > Archiving of outgoing documents: Documents created in Business Central are automatically structured with all relevant indexes and stored in ELO.
- > Outgoing documents such as invoices then appear on the order and customer, product data sheets in the article master/order item.
- > Incoming and outgoing documents are displayed in the Business Central client, even if they were not created there.
- > You automate your filing, archiving, and indexing.

## DMS AND ERP. PERFECTLY INTEGRATED.

"The Business Central Connector for ELO automates exactly where documents are created: in the ERP. ELO and Business Central work together seamlessly—from audit-proof archiving and automatic indexing to direct display in the Business Central client.

The result is a ready-to-use solution that requires no additional software and grows with the company over the long term."
