

## Business Central Connector for SharePoint - Add-On for the Microsoft Dynamics 365 Business Central ERP system

# SHAREPOINT BECOMES A FULLY-FLEDGED DMS DIRECTLY WITH DYNAMICS 365 BUSINESS CENTRAL

Microsoft SharePoint is one of the most widely used platforms for collaboration in companies. Documents can be created, edited, managed, and continuously developed centrally here. Whether invoices, contracts, or other documents—almost all files from everyday work are collected and stored here.

That's why it makes sense to use SharePoint not only as a work platform, but also as a fully-fledged document management system that you can then connect to your Business Central ERP.

### Consistent document logic and seamlessly integrated into Business Central

With the Dynamics 365 Connector for SharePoint, your existing SharePoint becomes the ideal

complement to Microsoft Dynamics 365 Business Central. The connection creates consistent document logic between ERP and DMS - without media breaks and without additional systems. Once SharePoint has been set up correctly, you can manage all outgoing documents directly in the context of your ERP processes and archive them in an audit-proof manner.

### Automatic archiving and indexing

The Business Central Connector for SharePoint expands your SharePoint with automated DMS functions. Documents are automatically archived and fully indexed from Business Central—for significantly more efficient and error-free document management.

# HOW YOU BENEFIT:

Your existing SharePoint becomes a DMS. A familiar solution that can be used immediately and is accepted by the team.

Workflows and automations for all documents created in the ERP system make your work easier.

SharePoint is the perfect archive. You'll never waste time searching again.

## THE MOST IMPORTANT HIGHLIGHTS

- > SharePoint becomes a DMS: No new software or system required.
- > Optimal filing and indexing: SharePoint DMS also meets the criteria for effective archiving.
- > You combine two solutions, remain 100% in the Microsoft world, and enjoy the usual high product standard.
- > You can automate your document management for all outgoing documents created in the ERP.
- > Documents are displayed in the Business Central Client and linked to the DMS—documents that were not created here can also be viewed in the ERP.
- > No programming knowledge required.

## 100% MICROSOFT SOLUTIONS

"With the combination of SharePoint, Business Central, and the right connector, companies can remain entirely within the Microsoft ecosystem for the first time.

Document management and ERP work together seamlessly—without third-party providers or system breaks. The result is a comprehensive solution with the quality and integration standards you expect from Microsoft."
